▶ LOGISTICS

Our proven expertise in procurement, warehousing, distribution and freight management can help you keep your supply chain - and your business - moving.

In Ukraine, we have over 20 years' experience of working for exacting, high-profile customers. With distribution centers in Kiev, Dnipro, Odessa, Lviv and Kharkiv, we remain the only logistics operator in the country capable of offering customers warehousing capacity across all its regions.

We work in close partnership with our customers, helping them to grow their business by taking full control of their logistics functions. Our unique business model gives our customers full supply chain transparency, allowing them to take advantage of the best deals in the market by sourcing independently from their preferred suppliers. With a particular emphasis on contingency planning, customers also benefit from our detailed understanding of the unique challenges associated with doing business in Ukraine.

Whatever the challenges, our customers know that we always deliver the HAVI promise on time, every time.

Going greener

We actively promote the principles of sustainable business practice. Among other green initiatives, we are fitting our distribution centers with environmentally efficient LED lighting. In addition, we are in the process of replacing our conventional delivery vehicles with more environmentally efficient compressed natural gas (CNG) trucks.
